new tech

INTEGRATE

safety and
efficiency

PREVENT

future
violations

Violators fund BusPatrol and Zonar technology, not you.

Illegally passing an extended stop-arm puts student riders at risk. And yet, millions of drivers do so every year. To address this growing problem, BusPatrol and Zonar® have partnered to offer an exclusive, comprehensive bus safety technology package. No upfront capital outlay, operating or management costs for you. Instead, funds to pay for it come from stop-arm violators.

Two industry leaders, one exclusive package.

Safeguard student riders, while enhancing your fleet's operations.

BusPatrol handles every aspect of its seamless stop-arm enforcement program, including equipment, maintenance, evidence, law enforcement coordination, collections and support. Violators are held accountable. Students are safer. And, BusPatrol runs the program for you.

Safer buses mean safer riders. In addition to BusPatrol's program, Zonar smart fleet management technology delivers greater fleet efficiency, student rider visibility, electronically verified inspection reporting and effective driver coaching. Also at no cost to you.

Features

- Complete stop-arm enforcement program
- Automated stop-arm cameras and technology
- Secure student ridership verification
- Electronically verified inspection reporting
- Real-time driver coaching
- Choice of smart fleet management package

Choose the fleet management package that fits.

BusPatrol's comprehensive stop-arm enforcement program is automatically included in this partnership. In addition, you have the choice between two Zonar smart fleet management packages, still at no cost to you.
