

FAMILY-OWNED DOYLE SIMS & SONS, INC.

Transitioned from AOBRD to ELD

Challenge	Action	Result
<p>As a smaller-scale operation, Doyle Sims & Sons Trucking, Inc. has always installed its own equipment and trained its own drivers. The company didn't have the resources to upgrade its entire fleet at once.</p> <p>With six months until the final deadline to transition to ELD, Sheena Brooks, logistics analyst for Sim & Sons, needed the tools to upgrade the fleet one truck at a time.</p>	<p>Zonar worked closely with Sims & Sons to ensure a smooth transition.</p> <ul style="list-style-type: none"> • Walked Sheena through the transition process, including updating computer records and firmware on devices • Answered pre- and post-transition questions and addressed concerns • Provided comprehensive series of support documents <p>Sims & Sons also used Zonar safety videos to train drivers. Zonar also provided useful resources to help get drivers on board with the new ELDs.</p>	<p>Zonar helped Sims & Sons update its 125-truck fleet, including vehicles based in South Carolina, within two months; well ahead of schedule.</p> <p>Zonar solutions involved Zonar Logs™ for ELD software update, testing and training</p>

"I always assume that something is going to go wrong, so that when it does I'll notice it. But for the most part, we really did not have any issues updating our fleet of 125 trucks and training our drivers, working with Zonar."
Sheena Brooks, Logistics Analyst
