

Zonar Professional Services

Drive success with custom innovation.

Today's fleets are sophisticated and run on complex, integrated, interconnected technologies. Yours may have unique requirements, challenges and technical goals that off-the-shelf solutions may not deliver. And you may need a custom report, real-time data stream or a customized project to solve an un-met business need.

Extend our platform to optimize your operation. Our standardized delivery process eliminates roadblocks and delays, so your custom services are up and running as quickly as possible. You need it, let's build it.

Create custom reports to fit your specific needs.

You know what data and types of insights are needed to understand your fleet's health and performance. Whether you have unique analytics needs or want to build a report by combining various, existing Zonar reports in Zonar Ground Traffic Control®, this option saves time and money. You no longer need to hire resources to constantly pull data and build the reports every day, week or month.

Tailored solutions for your needs

- Custom data tables and visualization
- Delivered in Microsoft® PowerBI
- Connected to Google BigQuery
- Full data validation and recovery

Key features

- Less time spent pulling and manipulating data
- Consolidates data in the back-end system
- Lowered data transfer costs
- Enables you to drive key initiatives and goals
- Higher ROI on your technology investment

Eliminate duplicate data and lower costs.

Need to maintain your own data repository or looking to lower your own data transfer costs? By leveraging the cloud data pipeline, we'll stream data to your own back-end system, and provide full data validation and recovery. By consolidating the data into your back-end system, this eliminates the need to de-duplicate.

Connect your entire fleet by providing GPS positions, engine diagnostics, inspections, hours of service and fuel metrics just to name a few.

Raise your ROI with custom projects.

Looking to create a solution that can quickly generate ROI for your business? Let's talk about a custom project to make that happen. Together, we'll create custom data and delivery components to drive innovation, optimize operations and create your own unique competitive advantage.
